

**Nathan Stump** leads the security team at Applied Intuition and has a decade of experience in cybersecurity. Prior to joining the team at Applied Intuition, he has led FIPS 140-2 certification for hard drives, was part of the Ford connected vehicle cybersecurity research team in the San Francisco Bay Area, and worked to apply cloud cybersecurity practices at Roche Biomedical to secure patient health information. Since joining Applied Intuition, Nathan has acted as the security evangelist inside of the organization and led multiple security efforts to improve the security standing of the organization. Additionally, Nathan is responsible for leading organizational compliance efforts for SOC 2 and NIST 800-171.
